Safety Data Sheet

When working with the above tools, make sure to observe the following safety instructions:

- Wear safety goggles when working with the tools.
- Assemble or disassemble the special step or cylinder head drill only when the drill machine is switched off and the drill has come to a standstill. Wear gloves to avoid cutting your hands.
- Use an Allen key 3 mm for assembly.
- When inserting the drill into the drill chuck make sure the drill is centered.
- When attaching the drill in the drill chuck make sure the starting torque is sufficient.
- Operate the drill with max. 2500 rpm and a maximum advance of 1.2 meters (3.9 ft) per minute.
